

# FIBERCABLE 2 SUITE

# FIBERTRACE 2 – FIBERCABLE 2

# RELEASE NOTE

# V 8.42

# MARCH 2018

## **Note**

This version needs a license version that is free of charge in case of upgrade of recent FiberTrace/Cable versions.

Without license, the software will work in its full FiberCable version for a 30 day trial period. After this trial period, the software will continue to operate, but in FiberTrace Viewer mode.

## FiberTrace 2 / FiberCable 2

### *Improvements*

- Improved management of the link information modification function when using blts files
- Improved management of FiberCable when limited memory on PC
- CD & AP: the last wavelength of the table is now available with associated measurements
- PIB: improved measurement with cursors

## FiberCable 2 Only

### *Improvements*

- OTDR: Improved PDF report generation when many OTDR alarms are present
- OTDR: improved management of connector alarms in bidir OTDR or loopback modes
- XLS Macro: saturated reflectance values now shown as >-xx.xx
