VIAVI

FIBERCABLE 2 SUITE
FIBERTRACE 2 – FIBERCABLE 2

RELEASE NOTE
V 8.32
MARCH 2017

Note

This version needs a license version that is free of charge in case of upgrade of recent FiberTrace/Cable versions.

Without license, the software will work in its full FiberCable version for a 30 day trial period. After this trial period, the software will continue to operate, but in FiberTrace Viewer mode.

VIAVI

FiberTrace 2 / FiberCable 2

New functionalities

➢ Generic: ability to organize the columns of the "Trace files" tab

➢ Generic: the files are now recognized as "supplier approved", this to improve security

➢ Generic: new icons for the file under windows

➢ OTDR: management of receive cable in distance and not only from an event. Also, using the event number, this is from the fiber end and not anylonger from the last event

Improvements

➢ Generic: improvement of the direct opening of result files from Google Chrome™

➢ PMD/CD: Addition of predefined 100G alarm thresholds

FiberCable 2 Only

New functionalities

➢ OTDR: Addition of total loss and total ORL thresholds on OTDR alarms tab for preview/report

➢ OTDR: Management of reports of inhomogeneous fibers

➢ OTDR: new column added, to stress the pass/fail information of the given test. Ability to update this column automatically or by clicking on the title of the column.

Improvements

➢ OTDR: Improved summary file, adding global ORL, max splice value, max connector loss value, reflectance max and number of events. This file can also be stored in .xls

➢ OTDR: Improved management of alarms opening when using Windows 10™

➢ Excel™ Macro: Improved management of small macro warning/errors
